

SQL Operator

1. Arithmetic Operators

Operator	Description
+	Addition
-	Subtraction
*	Multiplication
/	Division

2. Comparison Operators

Operator	Description
=	Equal to
>	Greater than
<	Less than
>=	Greater than or equal to
<=	Less than or equal to
<>	Not equal to

3. Logical Operators

Operator	Description
AND	Both conditions must be met
OR	One condition must be met
BETWEEN	Must be within the range
IN	Must be contained in the list
NOT	Gives the opposite result of what is specified
LIKE	Looks for a pattern

BETWEEN

(it is an inclusive statement)

```
SELECT *
FROM table-name
WHERE column-name BETWEEN lower and upper;

BETWEEN 5 and 10
5,6,7,8,9,10
```

Data Filtering -> WHERE statement / clause

- it is a filtering statement that we use to filter our data based on specific conditions

- We can use the SQL operators to build the conditions for filtering our data

Syntax!

```
SELECT column 1
      column 2
      column 3
FROM table-name
WHERE condition;
```

USERS

user_id	user_name	city
1	Nomvula	JHB
2	David	CPT
3	Anele	DBN
4	Kabelo	PTA
5	Lerato	PE

Write an SQL query to give the name of users in DBN

```
Select *
FROM users
WHERE city = 'DBN'
```

user_id	user_name	city
3	Anele	DBN

Membership - plan

plan_id	plan_name	monthly_price
101	Basic	79
102	Standard	129
103	Premium	199
104	Family	249
105	Mobile	59

Write an SQL query to give the plans that cost more than 150

↓
SELECT plan_name
monthly_price
FROM membership_plan
WHERE monthly_price > 150
↓

monthly_price > 150
= 151, 152, 153, 150, 091
not included

monthly_price >= 150
= 150, 151, 152, 153
included

plan_name	monthly_price
Premium	199
Family	249
