

Day Four - 04 June 2016

• Dataflow

• Online transactional processing database: a real time database that stores use to capture data. It is not used for analysing data

CREATE, INSERT, UPDATE, DELETE

- DB = Database shop 1,2,3, etc (collection)
- DW = Database warehouse (processing)

ETL Pipeline is used to move/transfer data from one place to another [source] [warehouse]

Data Management System

Datawarehouse

Have to connect to phone

- Memory card
